

Dear family, friends and followers,

Although it being already March we want to share with you some things of the Christmas action. With your great help we were able to, beside 30 packets, make 3 families happy with a kartload of firewood to overcome the wintercold. It is everytime an emotional rollercoaster to see the happy faces and at the same time to realize the awful situation these people are in. So is there, for example a young woman with two children, who's husband just left simply her, like that. She was ashamed to receive us and closed the door quickly behind us to hide her situation. There was also a widow of 75 years old who has to work the land without any help to forsee in her livelyhood. Or a grandmother who looked after her grandchild, because no one else does. So, there were many occasions where we could visit people and encourage them. Especially when you think thatr most of them are not capable to come up for themselves, earn no monty and there is no welfaresystem to care for them. This makes us greatfull to give these people just a little support. This is made possible thanks to your generous gifts and prayers and we want to thank you for that. I allowed us to-through the packets and the firewood let a little light shine in their darkness.

On our website [www.antipas.nl](http://www.antipas.nl) you can see a photoreport of the action

Thank you for your support and gift!

Cu salut, Dumnezeu sa va binecuvânteze
